Vernon and Virginia Furrow Awards

Presented by Sean P. Elliott, MD

Virginia Mann Sugg Furrow, MD. Virginia graduated from medical school in June 1942, one of only two females in her graduating class. During her career as a pediatrician, Virginia treated the young victims of Polio and Tuberculosis, and was one of the first doctors to treat patients with a new miracle drug called Penicillin. Married to Vernon Furrow on March 4, 1960, Virginia became his life partner in every sense of the word. She became a loving stepmother to Vernon's three children, and later a grandmother and great-grandmother to their children and grandchildren. She shared in the dream of Vernon's small lumber company, which later became Payless Cashway, and served as Vernon's co-adventurer as they travelled the world together. She was widely known for her commitment to the College of Medicine and its educational programs. After Vernon's death, she donated funds in his memory to establish the Furrow Awards (still our principal mechanism for peer recognition of excellence in education) and the Furrow Grants program (the forerunner of the AMES Grants program).
