

AMES Grants to Support Medical Education Research

To: College of Medicine-Tucson Faculty

From: Academy of Medical Education Scholars

Subject: Grants to support medical education research

As part of its commitment to excellence and innovation in medical education, the Academy of Medical Education Scholars (AMES) will fund a new round of grants to support **medical education-related research** at the College of Medicine. Eligibility includes College of Medicine-Tucson faculty members, fellows, residents, and medical students who are sponsored by a faculty member. AMES expects to award up to four grants in 2023-2024.

These grants are intended to support medical education research. Topics may include, but are not limited to, student assessment and evaluation, clinical skill trainings, and teaching modalities ([click here for resources](#)). Successful applications will include quantitative or qualitative evaluation of outcomes from this research and demonstrate the actual or potential impact of this work.

Funds may be requested for technical/analytical support (e.g., software development, statistical support) and for well-justified supplies and equipment, but **not for travel or for investigators' salaries**. Applicants are encouraged, but not required, to consult or collaborate with an AMES member (listed below) when preparing their proposals.

The application deadline is 12:00 pm, August 31st, 2023. Funds must be spent or transferred by the end of the academic year - June 30th, 2024. Investigators are **required** to present their preliminary results at the Medical Education Research Day in the spring and must provide a written final report on the results of their projects by September 1st, 2024. Failure to complete this requirement will disqualify the researcher from consideration of any future AMES grants.

Each proposal must include:

1. Name, degree, position/title, and department of the applicant(s). If the applicant is a medical student, a signed letter of sponsorship from a College of Medicine faculty member must be included in the application.
2. A proposal, no longer than 3 pages, describing the research plan, its context, and an assessment plan.
3. A budget for the project. Budgets are limited to \$5,000.

Combine application materials into a single PDF file and [SUBMIT HERE](#).
